Connectivity on the move

When it comes to keeping you connected across the globe, nobody does it better than e3.

As an independent communications integrator, we offer a portfolio of mobile communication systems from a wide choice of providers.

Our uniquely tailored solution of combined products and services including 4G, VSAT, IT and TV – sets us apart from others, many of whom can only deliver a single solution.

For the yacht, maritime, train and emergency response sectors, this means you can connect whenever you want, wherever you go.

This is e3 connectivity.

Business or pleasure, we make it happen

VSAT, Fleet Xpress, Inmarsat, Iridium and 4G; as one of the world's leading communications integrators, we make sure you are always connected so that you can go about your business and pleasure, with confidence and without interruption.

Tailored

With a wide choice of communication providers you can enjoy a true tailor-made solution to best meet any itinerary.

Personal

Your complete portfolio of services is overseen by your personal account manager – just one point of contact to ensure things run smoothly.

Smart

We make things easy through a fixed budget 'float' system to cover monthly payment and by providing a single statement for all your services.

Make an informed decision with a complimentary Data Audit

Before we recommend services and products, we would like to get to know you and your requirements a little better.

Our complimentary Data Audit service looks carefully at your current and seasonal communications needs, to see how they measure up against your existing services.

Our obligation-free report will recommend any changes to technology and services, while aiming to ensure you make the right choices for the right reasons.

Cost-effective 4G connectivity, with no commitments

Our family of SIMs offer unrivalled flexibility and benefits across Europe, the Caribbean, USA and the globe. When you are within a 4G signal, they deliver all the data you need at a cost that won't break the budget.

BIG DATA GLOBAL – competitively priced connectivity, unrivalled convenience and unlimited usage across the globe.

BIG DATA EUROPE – covering virtually all of Europe and the French Caribbean, enjoy unlimited usage with some of the cheapest 4G data afloat.

BIG DATA CARIBBEAN – with no commitments and no limits on usage, this is the SIM for those seeking flexibility across the region.

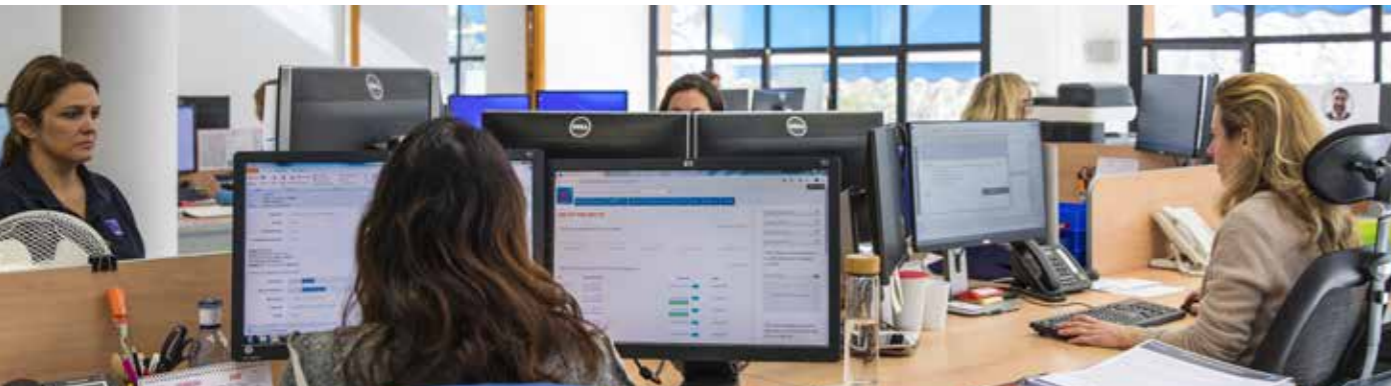

SUPERDATA USA – delivers unrivalled 4G LTE with unlimited usage and no risk of roaming charges.

Enjoy the freedom of VSAT from e3

e3's family of airtime solutions and value-added services – VAST VSAT - provides customers with freedom of choice, to ensure they are on the right service and the right plan. Offering Ku, Ka, L and C band frequencies, providers include

Inmarsat FX, eSAT, Speedcast, Marlink, Hispasat, Thor 7, KALO, and KVH.

e3 were the first to install a VSAT antenna on a yacht and continue to blaze a trail. We launched Inmarsat's Fleet Xpress and brought Kymeta's flat panel antennas to the yachting market. We also offer the latest stabilised antennas from industry innovators including Cobham and Intellian.

Value-added Kymeta

We provide a suite of services to support industry-leading Kymeta flat panels. Our proprietary eSAT delivers unrivalled-value connectivity, while with Bandwidth on Demand, you pay just for the airtime used, and groundbreaking TV on Demand offers IPTV bundled with pay-as-you-go airtime.

Value-added account management

Dealing with e3 is plain sailing. Your Account Manager is a single point of contact for all your e3 services, while similarly, we issue one statement detailing all our services. Our customer portal, my e3, provides easy access to all documentation and usage.

Sail safe with Inmarsat and Iridium

Where Ku-Band VSAT cannot offer coverage, Inmarsat and Iridium are alternative satellite frequencies providing extremely reliable communications across the world and are used by the Global Maritime Distress and Safety System.

You're always connected with HYBRID

e3's HYBRID solution offers you uninterrupted connectivity by switching between VSAT and 4G data wherever a signal is available.

Your favourite TV delivered globally

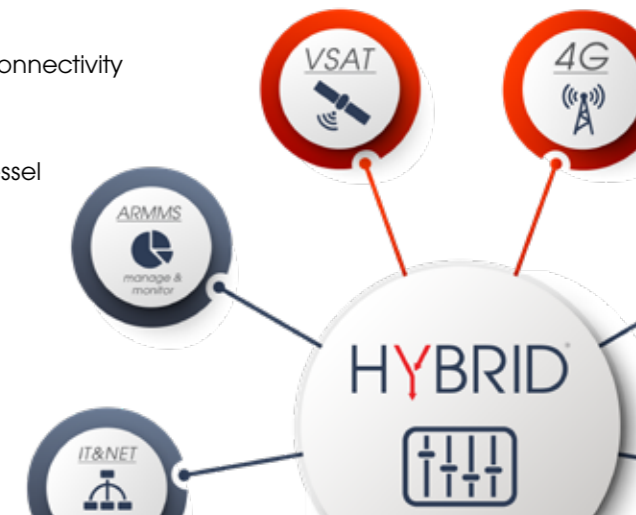

Our IPTV and TVRO solutions provide access to a wide range of TV channels from across the world in real time. IPTV is part of our HYBRID offering and can be powered by 4G and VSAT.

Exclusively for Kymeta flat panels, our airtime solution includes a full package of popular TV channels (including News, Cinema and Sport) at no extra cost.

Our digital satellite TVRO services are extensive and available in numerous languages. Contact our TV team to discuss our range of services and unrivalled flexibility.

The result is fast, seamless, secure and extremely controllable connectivity that ensures everyone on board remains connected wherever you sail. Bandwidth can be conveniently shared around the vessel to meet individual demands via the HYBRID APP.

PLUS, with HYBRID you will receive just one statement - featuring all your services - to add clarity and convenience to your budgeting.

Outstanding connectivity deserves exceptional support

e3 customers enjoy full service support available round the clock, with our Support Operations Centre (SOC) providing first-line assistance.

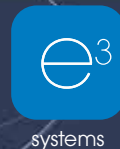

Our SOC remotely monitors all IP equipment on board the vessel every 10 seconds. This proactive 'deep dive' health check service is carried out to identify any issues and ultimately enables us to react and fix problems fast - often before they are known on board.

In addition, our standard agreement provides expert support through our Support Desk from our team of experienced engineers.
